

# Web solution for employers

*This document is a translation of an original Danish document. The original Danish document is the governing document for all purposes, and in case of any discrepancy, the Danish wording will be applicable.*

The Web reporting tool makes it possible for the employer to submit the monthly reporting to the Tax Department on the Internet. Due to new legislation all companies with more than 20 employees have to report on the Internet.

Furthermore, the Tax Department encourages all companies with fewer than 20 employees to utilize the Web reporting tool.

This solution also makes it possible to see earlier digital submissions and print receipts of prior reports.

Furthermore, it is possible to change log-in and password information and to opt-out of the monthly mailings from the Tax Department via the website.

## **This Guide Contains Information On:**

- 1. Logging into the Web**
- 2. Changing the password and log-in**
- 3. Opting-out from receiving monthly mailings**
- 4. Making the monthly report**
- 5. How to submit a nil report**
- 6. Display web reports and control data**
- 7. How to correct a report**
- 8. Greenlandic legislation**

Once you have confirmed that all data has been entered correctly you may log out and exit.

## 7. How to Make a Correction Reporting

If you made a mistake in the initial report or if new information makes it necessary to modify your report you may make a correction. This is possible and is very similar to the normal reporting process.

When a correction report is made the easiest way to fix an error is to redo the month's reporting but with a - (minus) sign in front of all the A-income and A-taxes values. Once this has been done, you may update and re-submit with the correct values.

Example in .CSV-file:

### First reported (Do not report this again):

```
99999999;01-12-2011;2412601224;32;200000;70000
99999999;01-12-2011;2412708765;31;200000;70000
99999999;01-12-2011;1010800000;20;200000;70000
```

### Correction reporting (Make a reporting with this):

```
99999999;01-12-2011;2412601224;32;-200000;-70000
99999999;01-12-2011;2412708765;31;-200000;-70000
99999999;01-12-2011;1010800000;20;-200000;-70000
```

### Then make the right reporting (Make a separate reporting with this):

```
99999999;01-12-2011;2412601224;32;250000;85000
99999999;01-12-2011;2412708765;31;250000;85000
99999999;01-12-2011;1010800000;20;250000;85000
```

A reversal will look like this when the report is displayed:

## **8. Greenlandic Legislation**

The Tax Department recommends you use a local advisor to make the report to avoid mistakes. According to Greenlandic legislation reporting must be done from Greenland. All information used in preparation of the report and other relevant documentation to the Tax Department must be stored in Greenland. (Landstingslov nr. 12 af 2. November 2006 om indkomstskat § 81, stk. 3).
